

New Request: Font

Tyrannical Requests' graphics department just started using Odoo and it seems they're losing their minds since their Odoo instance is not aligned with TR's brand kit!

They have requested to change the font of the backend of their Odoo instance to [Oswald](#).

Note: You should be familiar with CSS right? Odoo uses SCSS but you can still use CSS. You shouldn't need that much CSS knowledge to do this task.
