Change Request: Calculate instead

Tyrannical Requests Inc. has always been in the red regarding HR matters. Evidently, telling people to "get back to work" is not appropriate. So, the alert on the smiley/angry face should now be changed.

They have requested to change the alert on the smiley face to focus on the calculator input instead.

Note: The tech lead of the project does not approve the code unless everything is clean and separate. Calculator and smiley face components should be separate.
